

# FERNANDO DE LA TORRE

Full Stack-Software Engineer/Software Developer

## SUMMARY

Creative, detail-oriented, bilingual software engineer with a deep interest in AI. Proven track record of creating and implementing successful front and back-end web applications. Looking to bring my skills to a tech company with global reach.

## WORK EXPERIENCE

1997 — 1999

### Food and Beverage Controller at Wyndham Hotels & Resorts

#### Houston, TX

- Managed and controlled F&B costs, ensuring profitability while maintaining quality standards.
- Implemented inventory management systems to track stock levels and minimize waste.

### International Flight Attendant at United Airlines

#### Houston, TX

June 1999 — January 2014

Professionally blending safety and hospitality, delivered exemplary customer service. From maintaining a pristine cabin environment to serving meals and drinks, ensuring a comfortable journey for all passengers. My expertise extends to assisting Travelers with special needs, offering professionalized care throughout the flight. With meticulous preflight inspections, and emergency instructions, I prioritized passenger safety. Backed by extensive emergency and first aid training, handled medical emergencies with confidence, and enhanced the well-being of our valued passengers.

### Freelance Software Engineer / Consulting (Remote)

March 2016 — Present

- Collaborated with a team of developers to build modern and responsive web applications using best practices
- Built semantically structured full stack web applications
- Applied agile methodologies like SCRUM for project management
- Collaborated on open-source projects through GitHub

#### Recent Projects:

(Full stack Web App) –

**Recent Projects:** Was a part of a Remote International Team of Software Engineers who came together as a group with different ideas to help create an Entertainment/Game HUB containing a variety of games from which to choose.

**(Full stack Web App)** – HTML, CSS, JavaScript are some of the coding languages used for creating this project. As well as utilities like an AI Bot and a Random Regenerator for Player Vs Bot play.
